ORGANIC CONFECTIONERY

- **UNIQUE RECIPES**
- **FIRST ORGANIC, VEGAN, GLUTEN FREE & PALM OIL FREE PRODUCTS ON THE MARKET**

Why ORGANIC?

Organic ingredients come from controlled organic farming, not subjected to industrial crop techniques – **without artificial fertilizers, spraying, pesticides.** The cultivation method maintains a natural, sustainable growth cycle, respecting the natural environment.

Below methods are not allowed:

- irradiation of products with ionizing radiation,
- usage of genetically modified organisms (GMOs) and their derivatives,
- chemical processing,
- making food products from isolated food ingredients,
- additives such as: artificial colours, preservatives, flavour enhancers, solvents (beyond the limited list of additives of natural origin).

Audits are carried out by independent certification bodies at every stage of cultivation and processing. Which ensures that the above points are met.

SUPER FUDGIO HOW IT BEGAN

Not so long ago, despite of growing access to organic raw materials and developing demand for healthy products, finding sweet treats which would be healthy on one hand and delicious on the other was nearly impossible.

This great challenge to create sweets which are combine vegan, organic and free from was accepted by Iwona Kasica, a mother of 11 year old boy, who is suffering from food allergies. Despite of her interest in healthy life style Iwona is very concentrated on nature & ecology. Those were the main reasons why she has decided to create sweet treats, which her son could get without any risk and which would be delicious (comparing to raw sweets which were very common at that time).

SUPER FUDGIO

CONVENTIONAL SWEETS	OUR PRODUCTS
Contain, up to 60-75 % of white, rafinated sugar. Which means that they contain mostly empty calories and very little nutritional value. They can lead to weight gain and nutritional deficiencies. White sugar may cause also attacs of drowsines or extreme hunger pangs.	Super Fudgio sweets are produced based on coconut sugar, which is the rich source of magnesium, potassium, zinc, iron, B & C vitamins. Coconut sugar is not refined or artificially stained. Moreover, it has a low glycemic index (IG35). As an option cane sugar can be used.
Most of them are made of refined ingredients which have virtually no valuable microelemets.	We use only 100 % organic raw materials which are minimally processed. That makes them source of minerals.
Contain cow's milk and consequently – lactose and casein.	**Most of our products not contain lactose or casein, which means they are a sweet alternative for people with allergies and food intolerances.**
Contain glucose-fructose syrup known to be one of the key causes of obesity.	Do not contain glucose-fructose syrup.
Do not contain dietary fiber.	**Rich source of dietary fiber.**
Are mainly made from hydrogenated vegetable fat, including palm oil, which often contains trans fats.	Do not contain palm oil, which is harmful to the body and the environment! Contain coconut butter, sunflower and coconut oil in which there is no cholesterol or trans fats.
Are made with artificially created and processed raw ingredients, colourings and flavourings.	**Do not contain artificial additives such as dyes, emulsifiers or stabilizers.**
Mainly contain milk and whey protein.	Contain only vegetable protein (except milk products).
Products of animal origin.	**Do not contain raw materials of animal origin. Perfectly fit into the vegan diet (except milk products).**
Are usually very sweet in flavour.	The flavour is unique, delicate and not overly sweet.
Often made with usage of small amount or without nuts, instead of which artificial flavourings are used.	**They contain real hazelnuts and pistachio which have lots of valuable minerals.**
