ORGANIC CONFECTIONERY

- **UNIQUE RECIPES**
- **FIRST ORGANIC, VEGAN, GLUTEN FREE & PALM OIL FREE PRODUCTS ON THE MARKET**

Why ORGANIC?

Organic ingredients come from controlled organic farming, not subjected to industrial crop techniques – **without artificial fertilizers, spraying, pesticides.** The cultivation method maintains a natural, sustainable growth cycle, respecting the natural environment.

Below methods are not allowed:

- irradiation of products with ionizing radiation,
- usage of genetically modified organisms (GMOs) and their derivatives,
- chemical processing,
- making food products from isolated food ingredients,
- additives such as: artificial colours, preservatives, flavour enhancers, solvents (beyond the limited list of additives of natural origin).

Audits are carried out by independent certification bodies at every stage of cultivation and processing. Which ensures that the above points are met.

SUPER FUDGIO, HOW IT BEGAN

Not so long ago, despite of growing access to organic raw materials and developing demand for healthy products, finding sweet treats which would be healthy on one hand and delicious on the other was nearly impossible.

This great challenge to create sweets which are combine vegan, organic and free from was accepted by Iwona Kasica, a mother of 11 year old boy, who is suffering from food allergies. Despite of her interest in healthy life style Iwona is very concentrated on nature & ecology. Those were the main reasons why she has decided to create sweet treats, which her son could get without any risk and which would be delicious (comparing to raw sweets which were very common at that time).
